## DATA CENTRES & CRITICAL INFRASTRUCTURE

High-performance design,  
construction and mechanical  
delivery for complex, live and  
mission-critical environments.

# WHAT ROBERT MANN DOES

Robert Mann delivers integrated design, construction and mechanical services across data centres and critical infrastructure environments.

We operate in complex, high-performance settings where reliability, coordination and delivery certainty are critical — particularly in conditions where projects need to adapt and move quickly.

## Why it Matters Now

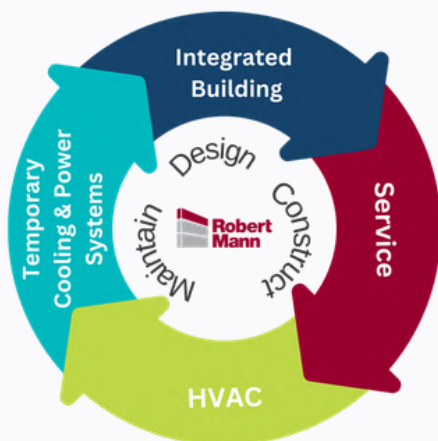

As demand across data centres and infrastructure continues to grow, delivery conditions are becoming more complex and, at times, uncertain.

Projects require partners who can operate with stability, respond to change, and maintain performance across the full delivery lifecycle.

Robert Mann is structured to do exactly that — supporting clients with consistent, reliable delivery where performance cannot be compromised.

## Why Robert Mann?

- Integrated multi-disciplinary delivery across design, construction and maintenance
- Proven capability in complex and critical environments
- Agile, responsive approach to changing project conditions
- Strong track record of maintaining business continuity
- Single point of contact for simplified project delivery

# WHERE ROBERT MANN ADDS VALUE

- Data centres and critical infrastructure environments
- Mechanical services and cooling systems
- Retrofit, upgrade and live environment delivery
- Temporary cooling and power solutions for rapid deployment
- End-to-end project delivery (Design, Construct, Maintain)

## Delivery Capability

- ✓ Nationwide coverage with local expertise and licensing
- ✓ Multi-trade teams delivering integrated solutions
- ✓ Rapid deployment to maintain operational continuity
- ✓ 24/7 service capability and responsive support

## Critical Environment Performance

Engineered to Perform. Delivered with Certainty.

Downtime and No  
Disruption to Operations

Proven delivery in live, operational environments

# PROVEN DELIVERY

## Data Centre Infrastructure Upgrade

Delivered complex mechanical and infrastructure upgrades within a live data centre environment, maintaining uninterrupted operations throughout.

## Hospital Mechanical Upgrade

Completed chiller and mechanical system upgrades without disruption to 24/7 hospital operations, ensuring continuity of critical services.

## Modular Data Centre Delivery

Delivered multiple modular data centres across multiple states, coordinating diverse methodologies and ensuring consistent project outcomes.

## Continue the Conversation

If you're planning a project, navigating changing delivery conditions, or reviewing infrastructure capability — we're happy to have a conversation.
